

QGIS Application - Bug report #8987

Opaque zone selections in Processing toolbox (Grass extensions)

2013-11-02 07:20 PM - Rhenriques Henriques

Status:	Closed	
Priority:	High	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	MacOSX Mavericks	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 17646
Description		
<p>Under the stable QGIS version 2 and Night Build QGIS 2.1 DEV 47b055f and prior ones, when we use the Processing toolbox and select any grass module that need an extent definition or zone selection from canvas (for instance v.voronoi), the selection square is an opaque red box. This opaque fill is not needed or, at least, this box should be semi-transparent. Otherwise it's impossible to see correctly what is below the area being selected. This must be corrected as soon as possible.</p> <p>Cheers</p>
