Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:	Windows XP	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	17666	

Description

Hi,

Our dba report us that in the postgres database (9.3) log there are some warning:

    2013-10-31 08:35:40.031 CET-base=sigpp-user=**********-host=******(4146)ATTENTION: ST_Estimated_Extent signature was
    deprecated in 2.1.0. Please use ST_EstimatedExtent
    2013-10-31 08:35:40.132 CET-base=sigpp-user=**********-host=******(4146)ATTENTION: ST_Force_2d signature was
    deprecated in 2.1.0. Please use ST_Force2D

We have that since we use Qgis 2.0. With the 1.8 version there was no problem.

Cheers,

Dada2801
