

QGIS Application - Bug report #9012

Wrong symbol size after saving print composer as image

2013-11-06 12:19 AM - Sake Wagenaar

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	2.0.1	<b>Regression?:</b> No
<b>Operating System:</b>	Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17667
<b>Description</b>		
<p>Saving a composition doesn't work properly for maps with graduated symbols. On the saved image, the symbols are much larger than in the print composer. The symbols are simple markers, sized with the option Size scale field. Size is expressed in map units. I also tried it with data defined properties, with the same result.</p> <p>The problem occurs with both QGIS 2.0.1 and QGIS 2.1.0-Master (eb6ca1e). I tested it on Windows 7 and 8.</p>		

History

#1 - 2013-11-07 02:00 AM - Giovanni Manghi

- Target version changed from Version 2.0.0 to Future Release - High Priority

#2 - 2014-10-27 01:58 PM - Nyal Dawson

- Status changed from Open to Feedback

I can't reproduce this. Is it still an issue in master?

#3 - 2014-10-28 10:02 AM - Sake Wagenaar

- % Done changed from 0 to 100

- Status changed from Feedback to Closed

This problem doesn't exist anymore in newer QGIS versions. At least not in QGIS 2.4.0.
