QGIS Application - Bug report #9028
PyQGIS cookbook docu on website mismatch api

2013-11-07 02:03 AM - Luigi Pirelli

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	Documentation and Help			
Affected QGIS version:	2.0.1		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:			**Copied to github as #:**	17683

Description

here:
http://www.qgis.org/en/docs/pyqgis_developer_cookbook/loadlayer.html#raster-layers

the code:
rlayer = QgsRasterLayer(uri, 'my_wcs_layer', 'wcs')

doesn't work due to mismatch with api that accept uri QString as stated in api signature:

QgsRasterLayer(const QString & uri,
          const QString & baseName,
          const QString & providerKey,
          bool loadDefaultStyleFlag = true);

History

#1 - 2015-03-05 05:53 AM - Alexander Bruy

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Seems fixed in documentation master
