QGIS Application - Bug report #903
Line breaks from internationalized messages don't appear in ts files

2008-01-14 09:00 AM - cdavila -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:			
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	10962

Description

I've detected that the \

 clause in the string tr(" is not a [[PostgreSQL]]/PostGIS layer.\

") from qgspggeoprocessing.cpp, that I suppose should mark a line break in the message, does not appear in the qgis.ts file.

Attached patch solves the problem for this case, but I think it can be happening in other cases.

History

#1 - 2009-07-03 08:08 AM - Paolo Cavallini

Has the patch been applied? Are there reasons not to do so?

#2 - 2009-07-03 08:36 AM - Jürgen Fischer

- *Resolution set to invalid*

- *Status changed from Open to Closed*

The line break appear in the ts files, but the (postgres) geoprocessing was replaced with fTools anyway and doesn't get build anymore anyway.
