Pull Request or Patch supplied:	No		**Resolution:**	wontfix
Easy fix?:	No		**Copied to github as #:**	17694

Description

This idea was taken from Arcgis and was suggested by people that do a lot of attributes editing:

- the user selects a column (as in a normal spredsheet application)

- then the user selects records/rows

- then it right click the mouse and a dialog shows

- in the field place there is the Field Calculator shortcut

- when open the FC is set to update the selected column and records

History

What about this

1. Select Records
2. Right click a column => context menu => field calculator
3. Defaults set to selected/chosen column

Less clicks, same behavior.

#2 - 2013-11-12 09:11 AM - Giovanni Manghi

sounds good

#3 - 2017-05-01 12:48 AM - Giovanni Manghi

- *Easy fix? set to No*

#4 - 2018-02-23 06:19 PM - Giovanni Manghi

- *Resolution set to wontfix*

- *Status changed from Open to Closed*

- *Description updated*
