Description		
This wmts service: http://geodata.nationaalgeoregister.nl/tiles/service/wmts/brtachtergrondkaart when loading the layer 'brtachtergrondkaart' in EPSG:28992 is working in QGIS 1.8 but does not work in QGIS testing/master. Besides this I have troubles (on windows only) with png8 images (or at least: if I select layers with png8 imgformat on debian I get a map, but on windows I do not see anything).
