<b>Affected QGIS version:</b>	2.0.1	<b>Regression?:</b> No
<b>Operating System:</b>	x86 64bit	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17715
<b>Description</b>		
<p>Applies to v2.x.x including most recent weekly build, worked previously in v1.8+</p> <p>When attempting to filter data while adding a PostGIS table, the filter returns and loads all records regardless of values specified in the "where" clause (tested to include values which should not return any records based on a where clause). Filter works from the TOC context menu after data has been loaded.</p> <p>Thanks, Damian Bradley</p>		

#### History

##### #1 - 2013-11-16 05:12 AM - Giovanni Manghi

- Target version set to Future Release - High Priority
- Priority changed from High to Normal
- Status changed from Open to Feedback
- Category changed from Browser to Data Provider/PostGIS

It works fine here, tested on both linux and windows.

##### #2 - 2014-06-23 04:34 AM - Giovanni Manghi

- Resolution set to worksforme
- Status changed from Feedback to Closed

closing for lack of feedback.
