QGIS Application - Bug report #9078
Labels are truncated in printing

2013-11-18 08:34 AM - Paolo Cavallini

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17723	

Description

Labels for items other that the current (focused) one can be truncated in the output.
I assume this means Atlas generates the whole map, the moves the
frame around, so labels are not placed according to the frame: is this interpretation
correct?
In any case, truncated labels should never occur.

History

#1 - 2013-11-18 08:34 AM - Paolo Cavallini

- Subject changed from Labels are trunacated in Atlas to Labels are truncated in Atlas

#2 - 2013-11-19 08:00 AM - Regis Haubourg

are you sure, it's related to Atals use case?
I have labels truncated also in static printing and main Mapcanvas.

#3 - 2013-11-19 10:14 AM - Paolo Cavallini

- Subject changed from Labels are truncated in Atlas to Labels are truncated in printing

Even worse then

#4 - 2014-04-06 06:04 AM - Jürgen Fischer

- Category changed from 33 to Map Composer/Printing

#5 - 2014-06-18 03:45 AM - Nyall Dawson

- Status changed from Open to Feedback

Is this still reproducible? If so, can you attach a screenshot or sample project & data which demonstrates the issue.

#6 - 2014-06-19 04:27 AM - Paolo Cavallini

- File tuncated.png added

The attached image should explain. Very easy to reproduce with any long label.

Thanks.

#7 - 2014-06-19 04:57 PM - Nyall Dawson

- Status changed from Feedback to Closed

- Resolution set to fixed/implemented

Try unchecking "Show partial labels" from the PAL label settings, that should fix this.

#8 - 2014-06-20 12:06 AM - Paolo Cavallini

OK, that works. However, the PAL settings are IMHO far too hidden.
