<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 10967
<b>Description</b>		
You can find a screenshot here: <a href="http://www.forumsig.org/showthread.php?p=131578#post131578">http://www.forumsig.org/showthread.php?p=131578#post131578</a>		
We have to increase the frame with the "dot" at the right of the map composer windows to be allowed to choose the page size and begin to compose our map.		
This occurs only in Linux system (not in Windows OS).		

#### History

##### #1 - 2008-01-16 11:01 PM - Gavin Macaulay -

- Resolution set to fixed
- Status changed from Open to Closed

The link doesn't have an image, but I think I know your problem. In any case, it has been fixed in version 0.9.2.

Regards

Gavin

Just for history, this is now correct in trunk as Gavin said:

<http://www.forumsig.org/attachment.php?attachmentid=2118&#38;d=1200478438>

Thanks,

Y.
