Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	17748

Description

Hi, QGIS 2.0 introduces a new OSM tool that allows to get the corresponding area of a layer directly from OSM and store it in a .osm XML file.

I tried multiple times, but just get always this response:

> Error downloading
> http://overpass-api.de/api/interpreter?data=(node(7.11345e+06,1.27115e+06,7.11383e+06,1.27162e+06);%3C);)out; - server replied: Bad Request

Comparing with the offial request, it seems that coordinates need to formated without exponents and maybe the end is wrong.
http://wiki.openstreetmap.org/wiki/Overpass_API/Language_Guide#All_data_in_a_bounding_box

Obviously, the call is wrong constructed

P.S. I guess more OSMappers will come and work with QGIS. So I recommend to create a appropriate category :)
