

QGIS Application - Bug report #9122
DXF of Italian Cadastral Map not load

2013-11-25 04:37 PM - SC SC

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/OGR	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17760
Description		
<p>Qgis and ogr doesn't load the files DXF of italian cadastral system, it give a error as file malformed. (error is: data source is invalid)</p> <p>Really these files are without header of normal dxf cad file, a workaround is load its in cad systems a save its without modify , this rebuild the header and permits to Qgis to work with that files.</p> <p>But this non is very good for newbie and for diffusion of Qgis.</p> <p>The cadastral maps are very important for the use an diffusion of gis system every software that open dxf not problem if header not exist , it will load the file with warning but load , Qgis stop all, is not good</p> <p>i put a file of this type as attachment for example</p>
