Crashes QGIS or corrupts data:	No		**Copied to github as #:**	17772

Description

Hi,

in the source file https://github.com/qgis/QGIS/blob/master/src/app/qgisapp.cpp, line 627

The comment is "load providers" like we can have several providers, but the text message (to be translated) say "Checking provider plugins" like if there could be only 1 providers ... is this a typo ?

What is done at this point of QGIS start ?
- loading the (unique) pluging to manage (several) providers,
- or loading the (unique) provider of (several) plugins
- or loading (several) providers of (several) plugins ?

Sylvain

Huh? "provider plugins" is the plural of "provider plugin".
