

QGIS Application - Bug report #9230

Double quote schema and table names

2013-12-18 06:50 AM - Bernhard Ströbl

Status:	Closed		
Priority:	Low		
Assignee:			
Category:	Data Provider/PostGIS		
Affected QGIS version:	2.0.1	Regression?:	No
Operating System:		Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #:	17851
Description			
<p>I regularly use upper case letters in my table names. Upon loading such a relation the PostGIS error log (and the PostgreSQL server's error log) fill with this type of message:</p> <p>Erroneous query: SELECT estimated_extent('my_schema','MY_Table','the_geom') returned 7 [ERROR: relation "my_schema.my_table" does not exist KONTEXT: SQL statement "SELECT has_table_privilege((SELECT usesysid FROM pg_user WHERE username = session_user), 'my_schema.MY_Table', 'select')"]</p> <p>the following statement works: SELECT has_table_privilege((SELECT usesysid FROM pg_user WHERE username = session_user), "my_schema"."MY_Table", 'select')</p> <p>the layer loads ok, though, but it would be nice if the log only shows "real" errors</p>

History

#1 - 2016-01-22 03:58 PM - Sebastian Dietrich

- Resolution set to duplicate
- Status changed from Open to Closed

Somehow the whole discussion happened in the duplicate (#12478), so I close this as *duplicate*.
