<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17867
<b>Description</b>  1. Raster - Georeferencer - Georeferencer; 2. Set `Linear` and check `Create world file`; 3. Set another transformation type: `Create world file` and `Output raster` are disabled and it is not possible to transform raster.  I guess checkbox `Create world file` should resets automatically when user choose transformation type which differ from `Linear`.
