QGIS Application - Bug report #9308
Impossible to remove a group

2014-01-07 08:59 AM - Andreas Neumann

Status:	Closed			
Priority:	Severe/Regression			
Assignee:	Alvaro Huarte			
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17916	

Description

In current master, when trying to remove a group in the legend - I get the message "no layer is selected" - to remove a layer you must select they in the legend" - by the way - is this correct english - "select they"? Maybe also a typo in the error message.

Anyway - groups are somehow mixed up with layers when I try to remove them.

Thank you for having a look at this issue!
