QGIS Application - Feature request #9330
Rotate Rendered Map Canvas

Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Easy fix?:	No		**Copied to github as #:**	17937

Description

Add an option in the settings dialog to rotate the rendered map canvas by a user specified angle relative to North 0. This would rotate the rendered layers as opposed to the actual final map output as is currently available in the map composer. A useful option when digitizing new features that have a directional aspect which would be better visualized and mapped if rotated (i.e. it would be nice to rotate the image attached by 90/270 degrees).
