

QGIS Application - Feature request #9338

Allow to select size of export image in Project > Save as Image.

2014-01-14 06:23 PM - baditaflorin -

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 17941
Priority:	Normal	
Assignee:		
Category:	Browser	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>This is real useful because this is the only way in Qgis to save a geo-referenced image, more exactly to get a world file with a image.</p> <p>but the image that is save is the screen resolution, so is not useful if i want to save a 5000x4000 px image to overlay on something in JOSM or other programs :)</p>		

History

#1 - 2014-01-30 11:34 PM - Paolo Cavallini

- Target version changed from Version 2.0.0 to Future Release - High Priority

#2 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No
