QGIS Application - Bug report #9358
Qgis 2.1 for Mac isn't able to save Project on a server share (Ubuntu based)

2014-01-16 10:12 AM - Riccardo Casoli

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Project Loading/Saving			
Affected QGIS version:	2.0.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	17958

Description

If I open a project located on a server share, Qgis creates immediately a new file in the project location with the same name except for a tilde "~" at the end. But when I try to save again my open project, Qgis gives an error telling that the Project file is protected or not writable due to insufficiente privileges. Any solution?
If I save the same project in my internal disk, I'm able to open and save it all times I want.

History

#1 - 2014-06-21 11:54 AM - Jürgen Fischer

- Status changed from Open to Feedback

- Category set to Project Loading/Saving

- Subject changed from Qgis 2.1 for Mac is'nt able to save Project on a server share (Ubuntu based) to Qgis 2.1 for Mac isn't able to save Project on a server share (Ubuntu based)

What are the permission of the file on the server?

#2 - 2014-10-12 09:55 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

closing for lack of feedback, please reopen if necessary.
