QGIS Application - Bug report #9359
The WCS client don't seem to refresh the cache

2014-01-16 12:47 PM - aperi2007 -

Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17959

Description

Using the client wcs from last trunk,

I notice that the client wcs with the option "always-cache" use a local cached data .

And never update it.

I guess the local-cache should be update sometime.

I guess a acceptable strategy could be to update the cache on every use of the network option,

or however almost every day.

Because if a user set the use of "always-cache" it should never see any update to the data in wcs server.

Revision 817f5a9a - 2014-10-27 12:04 AM - Larry Shaffer

Fix #9359; set default WCS caching to Prefer Network

- This is noted in the tool tip, but was not set. Always Cache was the

default, which caused the cache to never be updated on upstream changes.

Caveat: this does not fix projects with existing WCS layers.
