Description		
QGIS 2.1 nightly build crashed on loading a 1.9 project file. So I starting it as root and it now showed a bad WMS layer, which I cancelled, then it too crashed with the following trace: <pre>root@afrispatial:~# qgis Warning: loading of qt translation failed [/usr/share/qt4/translations/qt_en_ZA] Warning: Loading a file that was saved with an older version of qgis (saved in 1.9.0-Master, loaded in 2.1.0-Master).
