

QGIS Application - Feature request #9364

Provide a UI for creating custom Projection

2014-01-17 12:51 AM - Devdatta Tengshe

Status:	Open	Resolution: Copied to github as #: 17964
Priority:	Low	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>I often have to work with data, which is my Country's statutory projection. This is a custom LCC Projection, which does not have a EPSG code.</p> <p>Right now I have to create the Projection String by Trial & error.</p> <p>I Much prefer the way ArcGIS does it, where you can select the projection, and then the datum, and then only those parameters are shown which are necessary for that projection. The user can then fill in the projection parameters.</p> <p>This is much more user-friendly, than writing projection String.</p>
