QGIS Application - Bug report #9415 Problem with current Debian build

2014-01-23 05:32 AM - Andy Wood

Status: Closed

Priority: Severe/Regression

Assignee:

Category: Build/Install

Affected QGIS version:masterRegression?:NoOperating System:LinuxEasy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 18010

Description

In debian rules file, section: install: build

perl -i -pe 's=#!/usr/bin/env python=#!/usr/bin/python2.7=;' \$(find debian/tmp -name "*.py")

causes:

perl -i -pe 's=#!/usr/bin/env python=#!/usr/bin/python2.7=;'

-i used with no filenames on the command line, reading from STDIN.

I do not understand makefiles enough to provide a fix, but perhaps it should be something like (?): perl -i -pe 's=#!/usr/bin/env python=#!/usr/bin/python2.7=;' \$(find \$(CURDIR)/debian/tmp -name "*.py")

History

Andy.
