Crashes QGIS or corrupts data:	No	Copied to github as #: 18047
Description		
<p>Hi !</p> <p>There's a rectangle which represents the shadow of the paper in the composer. When moving objects around, they snap to this shadow rather than to the paper itself...</p> <p>I'd say this is a blocker since it didn't happen on 2.0</p> <p>Thanks !</p>
