

QGIS Application - Bug report #9462

layer.getFeatures on return the first feature

2014-01-30 07:05 AM - Arnaud Morvan

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18054
Description		
When I make iterator, I get only one feature while layer.featureCount() return 28 <pre>total = layer.featureCount() request = QgsFeatureRequest() iterator = layer.getFeatures(request) for feature in iterator:</pre> I use spatialite layer with QGIS 2.0.1-Dufour from apt-get on ubuntu 13.04		

History

- Status changed from Open to Feedback

Hi Arnaud,

Can you try to update the statistics for this layer? (Go to the "Add Spatialite Layer" dialog, connect to your DB and click "Update Statistics")

#2 - 2014-02-03 07:50 AM - Arnaud Morvan

I got an error : Error while updating internal statistics

#3 - 2014-02-03 09:01 AM - Arnaud Morvan

In iterator loop, I call layer.dataProvider().changeAttributeValues({ feature.id() : attrs })
when I comment this line the iterator work correctly

#4 - 2014-02-06 12:22 AM - Arnaud Morvan

- Status changed from Feedback to Closed

in version 2.0.1 vector providers do not allow multiples iterators
