Description

Title says it all. It'd be useful for the qgis.org ubuntugis-based ppa to offer ubuntu saucy qgis master builds as ubuntu saucy is still stuck with gdal 1.9 (while ubuntugis offers gdal 1.10).

- Resolution set to wontfix

- Status changed from Open to Closed

With 14.04 LTS out that includes gdal 1.10, this isn't much of an issue anymore.
