| Description [[OpenStreetMap]]r1 has now reached a reasonable mass, and extremely interesting results. It would be good to have a plugin downloading their data (useful eg as a background), and even better if it could also upload tracks and points. It should not be too difficult, as the API r2 and the xml r3 are well documented, and already in use by a number of clients. I believe this would make both OSM and QGIS more usable and powerful. r1 http://www.openstreetmap.org/ r2 http://wiki.openstreetmap.org/index.php/Protocol r3 http://wiki.openstreetmap.org/index.php/OSM_Protocol_Version_0.5#Returned_XML_data | | |

History

We have it now

<http://lists.osgeo.org/pipermail/qgis-user/2009-June/005514.html>

could this ticket be closed?

#2 - 2009-07-09 03:24 AM - Martin Dobias

We will close the ticket once the [[OpenStreetMap]] plugin enters SVN (so far it's not there).

Martin

Ok, thanks for the feedback.

#4 - 2009-07-30 04:31 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Open to Closed

The plugin entered in svn, closing.
