<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18095
<b>Description</b>  python iface has a method addToolBar, to add a toolbar with buttons. But there is no way to remove the toolbar.  I've created a toolbar, with proper unload function. So disabling the plugin removes all from menu's, but I cannot remove the toolbar. Which would be ok, if not a second one pops up when you enable the plugin again.		

#### History

##### #1 - 2014-02-06 12:55 PM - Jürgen Fischer

You can delete the toolbar.

##### #2 - 2016-01-18 07:52 AM - Alexander Bruy

- Resolution set to wontfix
- Status changed from Open to Closed

As Jürgen said, you can delete toolbar. Please reopen if necessary

##### #3 - 2016-01-19 01:29 AM - Richard Duivenvoorde

Just as information for future reference for others:

```
# remove a toolbar (eg in unloading a plugin with a toolbar)
del self.toolBar
```
