QGIS Application - Bug report #9508
Dissolve tool doesn't work

2014-02-07 02:29 AM - Jean-Michel Follin

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Processing/Core			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18099	

Description

There is a "vector map not found" error when i try to execute dissolve tool. It doesn't work with both temporary and permanent file (for saving dissolved layer) under qgis 2.0.1, but works fine under qgis 1.8.

History

- Category changed from GRASS to 94

Have you tried to upgrade "Processing" from the plugin installer?

I just tested v.dissolve with a shapefile and it worked as expected. Could you share your shp so we could test?

#2 - 2014-02-16 01:54 PM - Giovanni Manghi

- Status changed from Open to Feedback

I usually get the same issue when in the table of attributes there is a column with a reserved/invalid name, like "desc" or "ctãç".

Please have a look at your data, if you are unsure attach here a sample.

#3 - 2014-06-21 03:09 PM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

closing for lack of feedback.

#4 - 2015-06-07 04:30 AM - Giovanni Manghi

- Category changed from 94 to Processing/Core
