

QGIS Application - Bug report #9557

OSGeo4W x64 installer missing Windows manifest

2014-02-13 02:46 AM - Jacob Madsen

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Build/Install	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: up/downstream
Crashes QGIS or corrupts data:		Copied to github as #: 18143
Description		
<p>The OSGeo4w installer http://download.osgeo.org/osgeo4w/osgeo4w-setup-x86_64.exe is missing a Windows manifest, which requires you to run it manually as Administrator in Windows. The 32-bit version of the OSGeo4W does not have this issue. This should be an easy fix. You get no UAC prompt with 64-bit version, as you do with the 32-bit version.</p>		

History

#1 - 2014-02-13 11:13 AM - Giovanni Manghi

- Target version set to Version 2.2
- Category changed from Windows Package to Build/Install

#2 - 2014-02-13 11:14 AM - Donovan Cameron

- Status changed from Open to Closed
- Target version deleted (Version 2.2)

Hi Jacob. I've closed this ticket for now - please let the OSGeo4W package maintainers know of this issue at <http://trac.osgeo.org/osgeo4w/report/1>

If they re-iterate that this is a QGIS specific issue, than please, feel free to re-open.

Why? This isn't a QGIS problem.
