

QGIS Application - Bug report #9559

Composer guide lines get printed on map

2014-02-13 05:39 PM - Tim Sutton

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18145
Description		
<p>Using master with a composer template which is loaded in python, the generated pdf includes the composer guides. Can we ensure that they are always hidden before rendering the pdf?</p> <p>An example is attached.</p>

- Status changed from Open to Feedback

Can you test using QgsComposition::renderPage() to export the pdf and confirm if this works correctly? renderPage sets a bunch of important things before rendering the page, so skipping it and using render() directly on a painter will result in gui elements like the guides showing up in the output.

- Status changed from Feedback to Closed

Closing this out - resolved using advice given above. Thanks!
