QGIS Application - Bug report #958
wrong cursor after quiting edit mode

2008-02-22 01:52 AM - sieczka -

Status:	Closed			
Priority:	Low			
Assignee:	Jürgen Fischer			
Category:	Digitising			
Affected QGIS version:		**Regression?:**	No	
Operating System:	All	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	11017	

Description

1. add a vector layer

2. toggle edit on

3. select some editing tool

4. toggle edit off

The cursor remains for the last selected edit tool, although editing is disabled - confusing. If the last tool selected before quitting the edit mode is an edit tool, the cursor should be reset to what it was before entering the edit mode; propably by activating back the tool that was in use before toggling edit on.

As it currently is, a novice user happens to be not sure if he really quit the edit mode, since his cursor is the same as it was when he was editing (folks who I teach QGIS have this problem). BTW - I suggest to change cursor's color too for edit tools, eg. to red, to make the distinction even clearer.

QGIS 0.9.2 SVN r8171, QT 4.3.2.

History

#1 - 2008-03-04 12:40 PM - Maciej Sieczka -

This bug has further consequences:

1. toggle edit on for a line or polygon layer

2. start digitizing a segment, don't finish it

3. toggle edit off

You end up with a mixture of digitizing mode turned off and on, with all it's implications including confusion and possible data loss.

Still present in .

#2 - 2008-04-16 08:46 AM - Maciej Sieczka -

Still valid as of commit:b5286872 (SVN r8353).

#3 - 2008-06-18 10:26 AM - Jürgen Fischer

- Status changed from Open to Closed

- Resolution set to fixed

fixed in

#4 - 2008-06-23 08:31 AM - Maciej Sieczka -

- Status changed from Closed to Feedback

- Resolution deleted (fixed)

Replying to [comment:4 jef]:

> *fixed in*

Not completely. Still:

1. start qgis

2. don't select any tool

3. add a shapefile (eg. polygon)

4. select "add polygon" tool

5. toggle editing off

The cursor remains like it was in the editing mode.

#5 - 2008-06-23 10:00 AM - Jürgen Fischer

- Status changed from Feedback to Closed

- Resolution set to fixed

partly broken again with commit:5e58eb57 (SVN r8666) (initial tool was missed), fixed again in commit:7727bd5b (SVN r8675)

#6 - 2009-08-22 12:56 AM - Anonymous

Milestone Version 0.10.0 deleted
