

QGIS Application - Bug report #9599

QGIS_PLUGINPATH option raise an error

2014-02-19 01:25 AM - Regis Haubourg

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:		
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 18177
Description		
<p>Hi, I'm doing deploiement test here and found a blocker.</p> <p>A error message is raised when using QGIS_PLUGINPATH variable, even if all goes well after. additionnal plugins are loaded well.</p> <p>Additional path \\\NAS02\\groupe\\Refgeo\\Espace_Correspondants_SIG\\Astuces_Outils\\QGIS2_PLUGINS doesn't exist</p> <p>I tried using environnement variable, modifying qgis-dev.bat by hand and general options dialog to workaround but the behaviour is always the same</p> <p>Sorry for raising such blocker so late, but we have unit test on it, so I was focusing on other points.</p> <p>Régis</p>

Confirmed here.

btw, I think the correct message is "The extra plugin path '%1' does not exist".

It only raises when using a network path

Replacing '\\' with '/' seems to work.

Was it working with earlier versions ?

#2 - 2014-02-19 02:19 AM - Regis Haubourg

Yep, it works well in 2.0.1

#3 - 2014-02-19 02:30 AM - Hugo Mercier

Ok, got it.

Each '\\' is doubled for python path inclusion, but we check if it exists AFTER doubling the '\\'.
On Windows, doubling '\\' works for regular path, but not for the '\\\\' prefix.

Shame on me ... that is part of my last changes :(

I'll fix it asap.
