

QGIS Application - Bug report #9601

Point displacement: data defined size and angle does not work

2014-02-19 04:43 AM - Per Gammerath

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18179
Description		
<p>Point symbols can be angled through Data Defined Properties, but this function does not work with Point Displacement. Only point symbols that have not been displaced, are angled as prescribed. The Size property works though.</p> <p>Is this a bug? And when can this be fixed?</p>		

Associated revisions

Revision a6f96ba5 - 2016-06-16 03:03 PM - Nyall Dawson

Fix displacement symbols with data defined properties (fix #9601)

Previously only the attributes of the first feature were being used to render the points inside a group

Revision c33b7adc - 2016-07-01 10:42 AM - Nyall Dawson

Fix displacement symbols with data defined properties (fix #9601)

Previously only the attributes of the first feature were being used to render the points inside a group

History

#1 - 2014-02-19 11:29 AM - Giovanni Manghi

- Subject changed from *Point displacement angles* to *Point displacement: data defined size and angle does not work*
- Target version set to *Version 2.2*
- Priority changed from *High* to *Normal*
- Category set to *Symbology*
- Affected QGIS version changed from *2.0.1* to *master*

I can confirm the issue also for the size. It seems that for both the rotation and size the value used is the one of the first feature of the cluster, that is applied to all others.

PS

about "when": it depends, if it critical for you to have it fixed soon better have a look to the qgis page where are listed the companies that offer commercial support.

#2 - 2014-02-19 12:05 PM - Per Gammerath

Thank you for acknowledging the issue. I hope that it can be fixed in the next version. Actually, I would also hope to see some more options in the Displacement panel. Fx an option to add a leader from the origin to the displaced point, like in Google earth.

#3 - 2014-06-28 07:36 AM - Jürgen Fischer

- Target version changed from Version 2.2 to Future Release - Lower Priority

#4 - 2016-06-16 06:04 AM - Nyal Dawson

- Status changed from Open to Closed

Fixed in changeset commit:"a6f96ba51b736cc97b3d8d6a848940737a46a6bc".
