Description

The GetFeature Request does not return elements.

The response of the request is valid but with a bbox : 0,0,0,0 and no features.

The simple request :
- SERVICE=WFS
- VERSION=1.0.0
- REQUEST=GeTFeature
- TYPENAME=
- OUTPUTFORMAT=*

    returns no features.

Does TYPENAME= mean that you do not give a typename?

#2 - 2014-02-27 04:16 AM - René-Luc ReLuc

No, I had to write TYPENAME=* with the right typename.

The bug is not with all layers. We made more tests. QGIS-Server is not broken with spatialite layers and is broken with ESRI ShapeFile layers.
