

QGIS Application - Feature request #9688

store the layer data source in a saved style

2014-03-02 11:09 AM - Brent Wood

Status:	Closed	Resolution: Copied to github as #: 18253
Priority:	Normal	
Assignee:		
Category:	Vectors	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>I'd like to be able to save a style, and include the layer info including type & data source, so that the layer, style, action, labeling setup, etc, can be added to the map canvas in a single operation, instead of add a layer, choose properties, style, load, apply, save, exit...</p>
