QGIS Application - Bug report #973
Georeferencer - right-clicking in "delete point" mode behave incorrectly and crashes

2008-03-05 09:30 PM - Maxim Dubinin

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	C++ Plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11032

Description

Load attached JPG with attached points.
Choose remove point button (also created by QGIS and definitely not right, will send as another bug later).

First bug:
Right-click on 0,0 point - for some reason point 104,52 removed (I know right click is not supposed to remove points, but this is still incorrect behavior).

Second bug:
Keep right-clicking anywhere on the map - QGIS crashes.

See attachements.

History

#1 - 2008-03-05 09:36 PM - Maxim Dubinin

can't find how to edit the ticket, that I've submitted
Trac didn't let me upload the map (4Mb file), in case you need it, it is here:
http://gis-lab.info/share/N-48-XXVI.JPG

#2 - 2008-10-18 11:39 AM - Magnus Homann

- Resolution set to fixed

- Status changed from Open to Closed

The crash and deleting wrong one points was fixed with #1255 ().

Using only [[LeftButton]] was added in commit:53a9addd (SVN r9492).

#3 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted
