

QGIS Application - Bug report #9743

Handle bad layers - Oracle provider

2014-03-07 09:57 AM - Jonathan Moules

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 18293
Description		
<p>I'm trying to open a file that has "bad" Oracle layers in 2.2.0. This brings up the "Handle bad layers" dialog.</p> <p>The problem is, if I double click on any of the layers to try and fix them, I am presented with the "Select a file to replace" dialog. This is wrong because it should be an Oracle dialog of some sort.</p> <p>I can't see how it's possible to use the "Handle bad layers" dialog to correct an Oracle provider currently.</p>		

History

#1 - 2014-06-20 08:51 AM - Jürgen Fischer

- Resolution set to fixed/implemented
- Status changed from Open to Closed

datasource in "handle bad layers" now editable.
