

QGIS Application - Feature request #9744

Search as you type lookup in forms

2014-03-07 11:03 AM - cgsbob -

Status:	Open	Resolution: Copied to github as #: 18294
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
If you use a Value relation edit widget and the "domain table" that is used with this widget has many entries, you would have scroll a lot to find the value you are looking for. If you can type into that widget and have it search as you type, it would save a lot of time.
