QGIS Application - Bug report #9747
data defined properties

2014-03-08 03:33 AM - Alessandro Ciali

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Legend			
Affected QGIS version:	2.2.0	**Regression?:**	No	
Operating System:	win7	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18297	

Description

I noticed that, when using data defined properties in setting point symbol size, the symbol is well represented in view and composer view, but it disappears from legend, both in TOC and composer. I think it should be represented using at least the parameters set in properties window.

History
