

QGIS Application - Feature request #975

convert 'Identify Features' satellite window into Dock-able window/widget

2008-03-06 05:04 AM - Eric Jarvies

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11034
Description		
<p>At present time, when user clicks on the 'Identify Features' button, and then selects a feature on the QMainWindow, it opens a satellite window that only floats atop, and is incapable of being dragged and docked anywhere onto the QT Main Window.</p> <p>I suggest this window be made into a 'dock-able' window/widget, so that the user may opt to continue only managing one window... instead of two(amongst many other obvious benefits).</p>

I like the idea too, maybe like the actual way to show the attribute table, with an option to make it docked.

#2 - 2009-12-10 12:37 AM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

was implemented some time ago.
