

QGIS Application - Bug report #9759

rectangular polygons displayed as triangles in QGIS 2.2

2014-03-11 03:34 AM - Olav Peeters

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 18305
Description see attached sample file. In QGIS versions prior to 2.2 this .shp will be displayed as a set of rectangular polygons. In QGIS 2.2 (I tested this on Windows 7 and MacOSX 10.9, same result), this set of rectangular polygons is displayed as a set of triangles. This has also been signaled by another QGIS user: http://gis.stackexchange.com/questions/88723/qgis-2-2-geometry-error

- Resolution set to duplicate
- Status changed from Open to Closed

Duplicate of #9686 which has been fixed (fix will be included in the next release).

As a temporary workaround disable rendering simplification in the layer properties.
