| <b>Description</b>  |                     |                                      |
| This happens with Gnome3 at least. Should be an easy fix. |                     |                                      |

#### History

##### #1 - 2014-03-24 08:03 AM - Alexander Bruy

Just checked sources: minimize, maximize and close buttons enabled for modeler dialog explicitly. Seems Gnome 3 handle this differently from other DE/WM

##### #2 - 2014-06-23 09:00 AM - Paolo Cavallini

- Subject changed from Processing: model builder misses close and maximize buttons to Processing: model builder misses close and maximize buttons on Gnome3

##### #3 - 2014-11-17 11:41 PM - Alexander Bruy

- Category changed from 94 to Processing/Modeller

##### #4 - 2014-11-22 02:05 AM - Alexander Bruy

- Status changed from Open to Closed

Seems Gnome specific issue

##### #5 - 2014-11-22 05:49 AM - Paolo Cavallini

- Status changed from Closed to Feedback

We had similar issues in the past with different plugins. IMHO this should be handled in a clean way, also for G3 (now default VM in Debian Jessie)

##### #6 - 2015-05-22 01:03 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

just checked on G3, and it seems ok.
