

QGIS Application - Bug report #9822

Enhancing zool tools in Map Composer

2014-03-19 04:55 PM - Johanna Botman

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 18353
Description		
<p>Would it be possible to create a zoom tool that can focus in on a selection of the Map Composer by drawing an area? Currently the zoom tools work on a click to enlarge basis. If I am working on a large layout (A0, A1, A2) I then have to do a reasonable amount of panning to get to the area of interest. If I could draw an 'area of interest' with a zoom tool, it would take to the exact location that I want to see more clearly.</p>		

History

#1 - 2014-03-19 05:02 PM - Nyall Dawson

- Resolution set to invalid
- Status changed from Open to Closed

This is present in QGIS 2.2 - there's a new "Zoom" tool in the toolbar which functions as you've described. You can also switch at any time to this zoom mode by holding CTRL+Space and click-dragging a rectangle on the composition.
