| <b>Crashes QGIS or corrupts data:</b>  | No        | <b>Copied to github as #:</b> 18400 |
| <b>Description</b>   |           |                                     |
| <p>When connecting to a Postgis table objects are displayed in the map. When I make style categories based on a specific attribute, nothing is visible, map is blank, while attributes do exist. I've tried different postgis tables but they have all the same problem.</p> |           |                                     |

History

#1 - 2014-06-21 02:49 PM - Jürgen Fischer

- Status changed from Open to Feedback
- Category changed from Attribute table to Symbology

not reproducable. Which renderer with which attributes did you try?

#2 - 2014-06-28 07:36 AM - Jürgen Fischer

- Target version changed from Version 2.2 to Future Release - Lower Priority

#3 - 2014-10-06 11:51 AM - Giovanni Manghi

- Resolution set to worksforme
- Status changed from Feedback to Closed

Closing for lack of feedback.
