

QGIS Application - Feature request #994

Add delay to expansion of grouped items in legend

2008-03-15 12:29 PM - John Tull

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Map Legend	
Pull Request or Patch supplied:		Resolution: duplicate
Easy fix?:	No	Copied to github as #: 11054
Description		
<p>Is there a way to create or increase the delay before grouped items in the legend expand to reveal the sub-items contained within when dragging layers in the legend? When dragging layers past groups, it is a nuisance that groups expand so rapidly. Perhaps there is a way to add a delay before a folder pops open, and to not have the group expand at all if an item is dropped on a group item (i.e., keep the folder containing sub-items not expanded).</p> <p>I have not confirmed this on any platform other than OS X.</p>
