

QGIS Application - Bug report #9964

Cannot Save Edits to File Geodatabase Replica

2014-03-31 01:59 PM - Matthew Charton

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Provider/OGR	
Affected QGIS version: 2.0.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: not reproducible
Crashes QGIS or corrupts data:	Copied to github as #: 18461
Description	
<p>When trying to edit a File Geodatabase Replica in QGIS 2.0.1, everything works as expected until the user saves their edits. When pressing save, all edits revert back to their original state with no errors.</p> <p>FGDB Replica created in ArcGIS Desktop 10.2 from a SQL SDE Geodatabase.</p>	

History

#1 - 2014-03-31 02:07 PM - Matthew Charton

Just confirmed that this occurs in 2.2 as well.

As another note, if I copy the Feature Class into a new FGDB (thus breaking it out of the replica), I can edit it without any problems.

#2 - 2014-05-31 07:17 AM - Jürgen Fischer

- Priority changed from Severe/Regression to Normal

#3 - 2014-06-21 02:47 AM - Jürgen Fischer

- Category set to Data Provider/OGR

#4 - 2014-10-30 10:01 AM - Giovanni Manghi

- Priority changed from Normal to High

#5 - 2014-10-30 10:12 AM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from Yes to No

- Priority changed from High to Normal

#6 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#7 - 2018-03-01 12:29 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please test with a recent QGIS release (2.18 or 3), if the issue/request is still valid change the affected version accordingly, if is fixed/implemented then close the ticket. Thanks!

#8 - 2018-08-16 12:06 AM - Giovanni Manghi

- *Resolution set to not reproducible*
- *Status changed from Feedback to Closed*
- *Description updated*

Closing for lack of feedback.
