

QGIS Application - Bug report #9972

Selecting other map items does not respond after a while

2014-04-01 08:36 AM - Bernd Vogelgesang

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 18467
Description		
<p>After working a while with map items like legend or scale bar, the selection got "frozen" on the last item, and it is impossible to select another one.</p> <p>E.g. Making changes in a Text field. Text field is selected and editable. Clicking on the scalebar to select it (with the proper tool) yields no reaction.</p> <p>The focus remains on the textfield.</p> <p>The Menue and the toolbars are still fully functional. The only way to be able to procede with my print composer is to make a copy ("Duplicate Composer") or to close and reopen the hole project.</p> <p>QGIS 2.2, Win7 64 bit, OSGeo4W 32bit advanced install</p>

Do you have a sample project available I can use to test with?

#2 - 2014-05-13 12:34 PM - Andrew Carne

I can confirm that this happens to me frequently as well. It only seems to be an issue when opening pre-2.2 projects in 2.2.

I haven't yet been able to reproduce exactly what causes it to happen, but it's "frozen" on me three times this morning working on a project. Unfortunately the only files I have handy all contain large proprietary data sets and I can't upload. I will try to find or create a simple project to demo the error if I can.

#3 - 2014-05-31 07:44 PM - Nyal Dawson

- Resolution set to duplicate

- Status changed from Open to Closed

Duplicate of #10143. I've pushed a tentative fix to master. Do you mind testing the current dev version and giving feedback on the other issue?
