Description		
<p>Hi.</p> <p>I use QGIS 2 on many tablets (Windows 8 and Android) and I think that would be nice to have a separate button on toolbar to connect to the GPS. Now to connect to the GPS we have to use GPS Information pannel. But even on 10" tablet, panels take a lot of avilable space. I am just thinking about one small button on toolbar that connect map to the GPS.</p> <p>It would be great to have such a simple thing.</p> <p>Thanks</p>
