

QGIS Application - Bug report #9979

GRASS plugin: region resolution editing does not work

2014-04-02 09:48 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GRASS	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18473
Description		
<p>I open a raster, click on Edit grass region, change just the resolution, then I run r.slope - > the resulting map has the resolution of the input dtm, not that defined in the previous step.</p>

- Status changed from Open to Closed

Fixed in changeset commit:"5a8e4cca0152745aa84505cb3d7366547b5a8a12".

#2 - 2016-02-03 06:33 AM - Radim Blazek

The region is set correctly. It is r.slope.aspect which aligns output to input until -a flag is used. Because this is unexpected non standard behavior, I add -a flag as hidden option.
